

Entry Renovation – First impressions matter and starting from the parking lot to the museum entrance the NFTM wants to make an positive impact that imparts the importance of the agriculture and the joy farm toys can bring to people's lives.

Hall of Fame - The National Farm Toy Hall of Fame honors those individuals who innovate in the creation of farm toys and make a powerful impact on the collecting hobby.

History of Agriculture - The entire Museum and Learning Center renewal will be designed to align with STEM (Science, Technology, Engineering and Math) principles to guide the hands on activities and educational features.

Plant a Seed - interactive touch screen that allows user to virtually plant a seed and see a time lapsed video of corn, soybeans, cotton, wheat or whatever grow into a commodity and end with product images that are made by that plant

Farm Life - Planned as effective strategy for analyzing and crafting the visitor experience, this holistic approach focuses on making the visitor an essential part of the museum's story – transforming them from passive observers to active participants. Our goal is to create a dynamic museum learning environment and exhibit plan that teaches visitors more about agriculture.

Activity Tables– The NFTM would like to create activity tables that features a farm scene with monitors inlaid in the table. When kids “drive” a 1/64th scale farm toy over a monitor, a brief video/animation plays.
